

Date : 4th Sept. 2019

Dear Industry Professionals,
Greetings!!!

It gives us immense pleasure to announce that the **Pune Construction Engineering Research Foundation (PCERF)** Pune is organizing first seminar in the series, dedicated to Constro 2020 – theme 'Mechanized & Intelligent Construction'

on
20th Sept 2019
at
Institutions of Engineers Auditorium,
Shivajinagar, Pune.

The title of seminar is

'Emerging Technologies in Construction Industry'

It will give delegates a unique opportunity to understand various emerging technologies in construction industry for better and wider implementation. Due to large scale changes in building construction activities, such as high rise structures, greater and complicated nature of building construction and services, development of new /innovative construction materials and technologies, need for planned management of buildings in eco friendly manner, there has been a big shift of building construction scenario. Construction industry needs to adapt to these factors and used these advanced technologies in its day to day functioning.

Considering these aspects, the seminar is aimed to orient delegates about awareness of emerging technologies and its applications. Seminar comprises of presentations by technology experts followed by interaction with them.

We invite industry professional – Architects, Govt. Authorities, Developers, Structural Designers, Services Consultants, Contractors, Site/ Project Managers, Service providers and appeal them to participate in the seminar. The overall schedule of the seminar is as follows:
